

plot for sale Algueña, Vinalopó Mitjà

Land of vineyards in production for sale in the area of Algueña. The Monastrell grape is the grape grown in this wonderful vineyard. It is a grape capable of producing modern, powerful and high quality wines, with a high alcohol content and a high level of tannins, especially in hot years, which are sweetened after aging in barrels. They stand out for their intense ruby color, great flavor, fruity aromas and medium-high acidity. ~~Organic grapes are also grown, which are characterized by natural fertilizers for the vineyards, as far as possible generated by the crops' own biomass. The use of damaged grapes in the harvesting process is prohibited. The cultivation plots are free of agro-toxins and chemical additives, which means that the grapes produced are healthier. ~~This marvel has an area of 30,100 square meters, where you can enter the movie (A walk in the clouds) and live those spectacular scenes of harvesting in group and subsequent production of a wonderful wine. ~~With the particularity that on this land you can build a large house or more, just 500 meters from the village.~~I TELL YOU NO MORE, LIVE IT YOURSELF!
